adidas Talent Intelligence Platform — User Guide

> **Version:** 1.0 — March 2026 **Platform URL:** github repo-mocha.vercel.app

---

Table of Contents

Part I — Candidate Guide

1. Getting Started
2. Dashboard Overview
3. CV Upload & Profile Creation
4. Motivation Letter & Learning Agreement
5. Browsing & Applying to Jobs
6. Browsing & Applying to Internships
7. Tracking Your Applications
8. Language Assessments
9. Notifications
10. Profile & Settings

Part II — HR Manager Guide

11. Getting Started (HR)
12. HR Dashboard Overview
13. Job Openings Management
14. Internship Management
15. CV Upload & Processing
16. Candidate Evaluation
17. Received Job Applications
18. Internship Applications
19. Language Assessments (HR)
20. Analytics & Reporting
21. Promotional Campaigns
22. Notifications (HR)
23. Improvement Tracks
24. Data Export

Part III — Feature Status Reference

25. Feature Roadmap & Implementation Status

Part I — Candidate Guide

---

1. Getting Started (Candidate)

Accessing the Platform

1. Open the platform URL in your browser.
2. On the landing page, click **"I'm a Candidate"** to enter the candidate dashboard.
3. Your role is stored locally — you won't need to select it again in the same browser.

What You Can Do

As a candidate, the platform allows you to:

- Upload and manage your CV (auto-parsed by AI)
- Upload a motivation letter and learning agreement
- Browse open job positions and internships
- Apply to positions with one click
- Track all your applications and their statuses
- Take language assessments via secure magic links
- Receive notifications about new jobs, status updates, and announcements
- Manage your profile and notification preferences

> **Note:** There is currently no authentication system — the platform uses a role-based demo mode. A full login/authentication system is planned for a future release.

---

2. Candidate Dashboard Overview

After selecting your role, you land on the **Dashboard** page. This shows:

Section	Description
Total Applications	How many jobs you've applied to.
In Progress	Applications with status Submitted or Under Review.
Completed	Applications that are Accepted, Rejected, Hired, or Withdrawn.
CV Upload Zone	Quick-access drag-and-drop area to upload or re-upload your CV.
Motivation Letter	Section to upload an optional motivation letter (max 10 MB).
Learning Agreement	Section to upload a learning agreement (for Erasmus/internship candidates).

Sidebar Navigation

The candidate sidebar provides access to:

Menu Item	Destination
Dashboard	Home overview with stats and document uploads
Job Openings	Browse and apply to jobs
My Applications	Track submitted applications
Internship Applications	Track internship-specific applications

Menu Item	Destination
Assessments	View pending and completed language assessments
CV Upload	Upload/re-upload your CV
Notifications	View all notifications and announcements
Settings	Edit your profile and notification preferences

---

3. CV Upload & Profile Creation

How to Upload Your CV

1. Navigate to **CV Upload** from the sidebar (or use the dashboard upload zone).
2. **Drag and drop** your file onto the upload area, or click to browse files.
3. Accepted formats: **PDF**, **DOCX**, **TXT** (max 10 MB).
4. A progress bar shows the upload status.

What Happens After Upload

The platform uses AI to automatically extract structured information from your CV:

- **Personal Information:** First name, last name, email, phone, location, country, LinkedIn URL
- **Work Experience:** Job title, company, location, dates, description, current role flag
- **Education:** Institution, degree, field of study, dates, education level
- **Languages:** Language name and self-declared proficiency level
- **Skills:** Skill name and category

Reviewing & Editing Extracted Data

After the AI extracts your data:

1. All extracted fields are displayed in an **editable preview panel**.
2. Review each section (personal info, experiences, education, languages, skills).
3. Click into any field to correct or add missing information.
4. For languages, use the **CEFR level dropdown** (A1 → C2) to set your proficiency.
5. Click **Save** to confirm and store the data to your profile.

Duplicate Detection

If you upload a CV with the same email as an existing candidate, the system detects it:

- **Exact match (email):** 100% confidence — links to existing profile.
- **Name + location match:** 85% confidence — flags as likely duplicate.
- **Name only match:** 50% confidence — flags for manual review.

You can re-upload your CV at any time to update your profile with new information.

---

4. Motivation Letter & Learning Agreement

Motivation Letter

1. Go to the **Motivation Letter** tab in CV Upload or the dashboard upload zone.
2. Upload a file (PDF, DOCX, TXT — max 10 MB).
3. The system extracts the text content and stores it alongside your profile.
4. This document is available to HR when reviewing your application.

Learning Agreement (Erasmus / Internship Candidates)

1. Go to the **Learning Agreement** tab.
2. Upload your signed learning agreement document.
3. The document URL is stored and linked to your profile.
4. HR managers can access this when reviewing your internship application.

---

5. Browsing & Applying to Jobs

Finding Jobs

1. Navigate to **Job Openings** from the sidebar.
2. Use the **search bar** to search by job title, department, location, or country.
3. Use **filters** to narrow results:
    - **Job Type:** Full-time, Part-time, Contract, Internship
    - **Department:** Filter by department name
4. Results are paginated (default 100 per page).

Job Card Information

Each job card displays:

- Job title
- Job type badge (e.g., Full-time, Internship)
- Department, location, and country
- Status (Open, Draft, Closed, Archived)
- Link to original job posting (if available from external source)

Applying to a Job

1. Hover over a job card to reveal the **Apply** button.
2. Click **Apply** — the system immediately submits your application.
3. A confirmation message appears:
    - ☑ **"Application submitted"** — if successful.
    - ⚠ **"Already applied"** — if you've previously applied to this job.
4. You can only submit **one application per job**.

---

6. Browsing & Applying to Internships

Finding Internships

1. Navigate to **Job Openings** and filter by type **Internship**, or browse the dedicated **Internships** section if available.
2. Internships marked as **Active** are available for applications.
3. Each internship card shows:
    - Title with a graduation cap icon
    - Department, location, country
    - Start/end date range
    - Stipend amount (if specified)
    - **Erasmus+** badge (if the internship is part of the Erasmus programme)
    - Mentor name and email

Applying

The application process is the same as for regular jobs — click the **Apply** button. If a learning agreement is required, you can upload it via the **Learning Agreement** tab.

---

7. Tracking Your Applications

My Applications Page

Navigate to **My Applications** to see all your submissions.

Application Statuses

Status	Meaning
Submitted	Your application has been received.
Under Review	HR is actively reviewing your application.
Invited	You've been invited for an assessment.
Assessed	Your assessment has been completed and scored.
Shortlisted	You've advanced to the next stage.
Rejected	Your application was not selected.
Withdrawn	You withdrew your application.

Page Layout

- **Active Applications:** All non-withdrawn, non-rejected applications appear at the top.
- **Past Applications:** Withdrawn and rejected applications appear in a separate section.
- **Stats Cards:** Show total active applications and pending review count.

Withdrawing an Application

For any active application, click the **Withdraw** button. This action:

- Changes the application status to **Withdrawn**.

- Moves it to the Past Applications section.
- Notifies HR of the withdrawal.

Internship Applications

Navigate to **Internship Applications** for a filtered view showing only internship-type applications. This includes:

- All the same status tracking as regular applications.
- **Learning Agreement link** (if you uploaded one) — click to view or download.
- Erasmus badge indicator.

---

8. Language Assessments

How Assessments Work

The platform supports AI-powered language verification assessments. When HR invites you for an assessment, you'll receive:

1. A **notification** in the Notifications panel.
2. A **magic link** — a unique, time-limited URL sent to your email.

Assessment Types

Type	Duration	What You Do
Listening & Written	~30 min	Listen to audio prompts, provide written responses.
Speaking	~20 min	Read and respond to prompts verbally (recorded).
Reading Aloud	~15 min	Read a text passage aloud (recorded).
Combined	~45 min	Multi-section assessment covering listening, writing, and speaking.

Taking an Assessment

1. Click the magic link from your email or notification.
2. The assessment page loads — no login required.
3. Follow the on-screen instructions for each section.
4. Submit when complete.

> **Important:** Magic links expire after **48 hours** by default. A countdown shows time remaining. Once expired, the assessment becomes unavailable.

Viewing Results

After scoring, your assessment results page shows:

- **Overall score** (out of 100)
- **CEFR level** (A1 Beginner → C2 Proficient)
- **Detailed dimension scores:**

    - Grammar (0–100)
    - Vocabulary (0–100)
    - Clarity (0–100)
    - Fluency (0–100)
    - Customer Handling (0–100)
- **AI-generated feedback** summary
- **Borderline indicator** — if your score falls between 45–60, you may be offered an improvement track

> 🚧 **Partially Implemented:** The assessment results display is functional, but the full candidate-facing assessment taking experience (audio recording, speech-to-text, timed sections) is still under development. Currently, assessments are demonstrated with mock data.

---

9. Notifications (Candidate)

Notification Center

Navigate to **Notifications** to see all messages and alerts.

Types of Notifications You Receive

Category	Notification Types
Jobs	New Job Posted, New Internship Posted, Job Status Changed
Applications	Application Received (confirmation), Status Changed, Withdrawal Confirmed
Assessments	Assessment Invitation, Assessment Completed (results available)
Profile	CV Upload Confirmed, Candidate Status Change
Promotional	HR announcements and campaigns (rich text with images and links)

Features

- **Unread badge:** Shows the count of unread notifications.
- **Mark as Read:** Click the checkmark icon on any notification.
- **Mark All as Read:** Bulk-mark all notifications as read.
- **Pinned campaigns:** Important HR announcements appear at the top.
- **Rich content:** Promotional notifications may include formatted text, images, and clickable links.

Notification Filtering

Notifications respect your preferences (see Settings). If you've opted out of job or promotional notifications, those types won't appear.

> **Note:** Archived campaigns (campaigns the HR team has retired) are automatically hidden from your view.

---

10. Profile & Settings

Editing Your Profile

Navigate to **Settings** to manage your personal information.

Personal Information Fields

Field	Description
First Name / Last Name	Your full name
Email	Contact email
Phone	Phone number
Location / Country	Where you're based
LinkedIn URL	Link to your LinkedIn profile
Date of Birth	Your date of birth
Nationality	Searchable dropdown (195+ nationalities)
Bio	Short description about yourself

Career Preferences

Field	Options
Willing to Relocate	Yes / No toggle
Availability	Immediately, 1 month, 2 months, 3+ months
Work Model	Remote, Hybrid, On-site

Notification Preferences

Customize what notifications you receive:

Toggle	Effect
Job notifications	Receive alerts when new jobs are posted.
Internship notifications	Receive alerts for new internships.
Only my country	Only receive notifications for positions in your country.
Highlights & announcements	Receive promotional campaigns from HR.
Field of work filter	Select specific fields (e.g., Computer Science, Marketing, Engineering) — you'll only receive notifications for matching positions. Leave empty to receive all.

Changes are saved automatically when you toggle a preference.

Part II — HR Manager Guide

---

11. Getting Started (HR)

Accessing the HR Dashboard

1. Open the platform URL.
2. On the landing page, click **"I'm an HR Manager"** to enter the HR dashboard.
3. Your role is stored locally for future visits.

What You Can Do

As an HR manager, the platform provides:

- Create, edit, and manage job openings and internships
- Bulk-sync jobs from the adidas careers website
- Upload and AI-parse candidate CVs (single or bulk)
- Evaluate candidates with AI-powered scoring
- Review and manage all received applications
- Invite candidates for language assessments
- View analytics on recruitment pipeline and performance
- Create and send targeted promotional campaigns
- Manage notifications for all recruitment events
- Export candidate data to CSV

> **Note:** The platform currently uses a demo role-selection model without authentication. A full login system with role-based access control is planned for a future release.

---

12. HR Dashboard Overview

The main HR dashboard displays four key performance indicator cards:

Card	Data
Total Candidates	Number of candidate profiles in the system
Open Positions	Number of currently open job listings
Total Applications	All applications received across all jobs
Shortlisted	Candidates that have been shortlisted

Data is fetched in real-time from the `/api/analytics` endpoint.

HR Sidebar Navigation

Section	Menu Items
Dashboard	Home, Settings, Notifications
Recruiting	Job Openings, Job Applications, Candidates Evaluation
Internships	Internships, Internship Applications
Processing & Analytics	CV Upload & Processing, Analytics

---

13. Job Openings Management

Viewing Jobs

The **Job Openings** page shows all job listings with:

- Job title (links to external posting if available)
- Department, location, country badges
- Status badge: **Open**, **Draft**, **Closed**, **Archived**
- Type badge: **Full-time**, **Part-time**, **Internship**, **Contract**
- Match count (candidates matched) and assessment count
- Edit and Delete action buttons

Searching & Filtering

- **Search bar:** Full-text search across title, department, location, country.
- **Department filter:** Multi-select combobox to filter by department.
- **Country filter:** Multi-select combobox to filter by country.
- **Pagination:** Navigate through results (20 per page) with first/prev/next/last controls.

Creating a New Job

1. Click the **"New Job"** button.
2. Fill in the form:

Field	Required	Description
Title	☑	Job title
Type	No	Full-time (default), Part-time, Contract, Internship
Department	No	Department name
Location / Country	No	Job location
Description	No	Full job description

3. **Optional Requirements** (expand the section):
    - Required Language and target CEFR Level (A1–C2)
    - Experience Type and Minimum Years
    - Education Level
4. Click **Save** to create the job as a new listing.

Editing a Job

Click the **pencil icon** on any job card to open the edit dialog. Make changes and save.

Deleting a Job

Click the **trash icon** on a job card. The job and all associated data are removed.

Syncing Jobs from adidas Careers Website

1. Click the **Sync Jobs** button (refresh icon).
2. The system scrapes the adidas careers page using a Cheerio-based web scraper.
3. A results banner shows:
    - Jobs scraped, created, updated, failed
    - Duration of the sync operation
4. Newly found jobs are created; existing jobs (matched by external ID) are updated.

> The scraper can retrieve all ~1,019 adidas job listings across 50+ countries and 16 departments.

---

14. Internship Management

Viewing Internships

The **Internships** page shows all internship listings. Each card displays:

- Title with graduation cap icon
- Department, location, country
- Status: **Draft**, **Active**, **Inactive**, **Finished**
- Start/end date range
- Stipend amount
- **Erasmus+** badge (if applicable)
- Mentor name and email
- Language, experience, and education requirements (if set)
- Match count and assessment count

Creating an Internship

1. Click **"Create New Internship"**.
2. Fill in the standard job fields (title, department, location, country, description).
3. **Internship-specific fields:**

Field	Description
Start Date	When the internship begins
End Date	When the internship ends
Status	Draft, Active, Inactive, Finished
Stipend	Compensation (e.g., "€800/month")

Field	Description
Erasmus+	Checkbox — mark as Erasmus programme
Mentor Name	Supervising mentor's name
Mentor Email	Mentor's contact email

4. Optional requirements (language, experience, education) — same as for jobs.
5. Save to create the internship.

Editing & Deleting

Same as for regular jobs — use the pencil/trash icons on each card.

> **Tip:** Only **Active** internships are visible to candidates. Use Draft status to prepare listings before publishing.

---

15. CV Upload & Processing

Single CV Upload (HR)

1. Navigate to **CV Upload & Processing**.
2. Drag and drop a candidate's CV (PDF, DOCX, or TXT — max 10 MB), or click to browse.
3. The AI pipeline runs a 9-stage process:
    - File validation → Cloud storage → Text extraction → LLM parsing → Schema validation → Deduplication → Candidate creation/update → CV scoring → Complete
4. The parsed results appear in an editable preview.
5. Review and correct extracted data as needed.
6. Click **Save** to store the candidate profile.

What the AI Extracts

- Full name, email, phone, location, country, LinkedIn URL
- Complete work history (title, company, dates, description)
- Education history (institution, degree, field, dates, level)
- Languages with proficiency levels
- Skills categorized by type

Duplicate Handling

The system checks for duplicates at three tiers:

1. **Email match** → **100% confidence** — updates existing candidate
2. **Name + location** → **85% confidence** — flags as likely duplicate
3. **Name only** → **50% confidence** — flags for manual review

If a duplicate is detected, you'll see a "Duplicate Of" link to the existing profile.

CV Scoring

Each uploaded CV is automatically scored on four dimensions:

Dimension	Weight	What It Measures
Experience Quality	35%	Relevance and depth of work experience
Years of Experience	25%	Total professional experience
Education Level	20%	Highest qualification and field relevance
Location Match	20%	Proximity to job location

Score colors: 🟢 Green (≥70), 🟡 Yellow (≥45), 🔴 Red (<45).

Bulk Upload

> 🚧 **Partially Implemented:** The bulk upload interface exists with a route at `POST /api/upload`, but async processing with progress tracking is not yet functional. Currently, CVs should be uploaded one at a time. Future releases will support batch upload of multiple CVs (including ZIP archives) with a real-time progress tracker.

---

16. Candidate Evaluation

Candidates List

Navigate to **Candidates Evaluation** to view the full talent pool.

Search & Filter

- **Search bar:** Search by name or email.
- **Status filter:** Dropdown to filter by candidate pipeline status:
  - New, Parsed, Screened, Invited, Assessed, Shortlisted, Borderline, On Improvement Track, Rejected, Hired

Candidate Table

Column	Description
Name	Candidate's full name (click to open profile)
Location	City/country
Status	Current pipeline status badge
CV Score	Overall score with visual color-coded bar
Languages	Self-declared languages
Added Date	When the candidate was added to the system

- **Sortable columns:** Name, CV Score, Added Date — click column header to toggle ascending/descending.

- **Pagination:** 20 candidates per page with navigation controls.
- Click any row to navigate to the **candidate detail page**.

Candidate Detail Page

> 🚧 **Placeholder:** The candidate detail page exists but currently has limited functionality. Future releases will include a comprehensive candidate profile view with: full CV data, assessment history, scoring breakdown, application history, collaborative notes, and tagging capability.

Collaborative Notes

> 🚧 **Partially Implemented:** The API endpoint for adding notes to candidate profiles (`POST /api/candidates/[id]/notes`) is functional, but the UI component to display and manage notes is not yet built.

Candidate Tagging

> 🚧 **Partially Implemented:** The database model for candidate tags exists, but the API endpoints and UI for creating and managing tags is not yet completed.

---

17. Received Job Applications

Viewing Applications

Navigate to **Job Applications** (under Recruiting) to see all received applications.

What's Displayed

Each application card shows:

- **Job title** with department, location, and country
- **Application status** badge (color-coded)
- **Candidate information:** Name and email (highlighted box)
- **Applied date**
- **Link to external job posting** (if synced from external source)

Status Badges

Status	Color	Meaning
Submitted	Blue	Newly received application
Under Review	Yellow	HR is reviewing
Invited	Purple	Assessment invitation sent
Assessed	Indigo	Assessment completed
Shortlisted	Green	Candidate advanced
Rejected	Red	Application declined

Status	Color	Meaning
Withdrawn	Gray	Candidate withdrew

Search

Use the search bar to search across job title, candidate name, email, department, location, and country.

> **Note:** Withdrawn applications and internship applications are automatically excluded from this view. See the Internship Applications section for internship-specific applications.

---

18. Internship Applications

Viewing Internship Applications

Navigate to **Internship Applications** (under Internships) for a filtered view of internship-specific applications.

This view is identical to job applications but:

- Only shows applications where the job type is **Internship**.
- Displays a **graduation cap** icon in the header.
- Shows a **Learning Agreement** link when the candidate has uploaded one.
- Excludes withdrawn applications.

---

19. Language Assessments (HR)

Assessment Overview

The **Assessments** page lets you manage language verification assessments for candidates.

Assessment Types

Type	Icon Color	Duration	Purpose
Listening & Written	Blue	30 min	Written comprehension and response
Speaking	Green	20 min	Verbal response evaluation
Reading Aloud	Purple	15 min	Pronunciation and fluency
Combined	Amber	45 min	Multi-section comprehensive test

Assessment Statuses

Status	Description
Pending	Created but not started — shows countdown to expiry
In Progress	Candidate is currently taking the assessment
Submitted	Completed, awaiting AI scoring

Status	Description
Scored	AI has scored the assessment
Reviewed	HR has reviewed the scored assessment
Expired	Time limit passed without completion

Creating an Assessment

1. Select a candidate and a job.
2. Choose an assessment type (or use a template).
3. The system generates a **magic link** — a unique, time-limited URL.
4. The magic link is sent to the candidate via email (uses Resend integration).
5. The link expires after 48 hours by default.

Reviewing Results

For scored assessments, the results panel shows:

- **Overall score** (0–100) with CEFR level estimation
- **Five dimension scores:** Grammar, Vocabulary, Clarity, Fluency, Customer Handling
- **AI-generated feedback** text
- **Borderline indicator:** Candidates scoring 45–60 are flagged for potential improvement track

CEFR Level Guide

Level	Label	Score Range
A1	Beginner	0–19
A2	Elementary	20–39
B1	Intermediate	40–59
B2	Upper Intermediate	60–74
C1	Advanced	75–89
C2	Proficient	90–100

> 🚧 **Partially Implemented:** Assessment creation, magic link generation, and email delivery are functional. The candidate-facing assessment execution UI (audio recording, speech-to-text via Whisper, timed sections) is still under development. Currently, the assessments page displays mock data to demonstrate the scoring and results visualization.

---

20. Analytics & Reporting

> 🚧 **Placeholder:** The Analytics page exists with the Recharts charting library (v3.7) installed, but the data visualizations are not yet wired to live data. The following charts are planned:

Planned Analytics Views

Chart	Type	Description
Overview Cards	Stats	Total candidates, open positions, applications, shortlisted, assessments
Candidate Pipeline Funnel	Funnel	Flow: New → Parsed → Screened → Invited → Assessed → Shortlisted → Hired
Candidates by Country	Pie Chart	Geographic distribution of talent pool
Top Skills	Horizontal Bar	Most common skills across all candidates (top 10)
Applications per Job	Bar Chart	Top 10 jobs by application volume
Application Trend	Line Chart	Daily application count over last 30 days
Score Distribution	Histogram	Distribution of CV scores across all candidates

> **Note:** The overview stat cards on the main HR dashboard **are** functional and show real data from the analytics API. The detailed charts on the dedicated Analytics page are the components still being wired.

---

21. Promotional Campaigns

Campaign Overview

The campaign system allows HR to create and send rich promotional announcements to candidates. Campaigns appear in candidates' notification feeds.

Campaign Lifecycle

Campaigns follow a linear four-stage lifecycle:

```
Draft  →  Sent  →  Terminated  →  Archived
```

Status	Meaning
Draft	Being prepared — not visible to candidates. Can be edited, sent, or deleted.
Sent	Live and visible to candidates. Shows read statistics. Can be terminated or cloned.
Terminated	Stopped — still visible to candidates who received it. Can be archived.
Archived	Hidden from candidates entirely. Can be deleted. Data retained for HR reference.

Creating a Campaign

1. Navigate to **Notifications** from the sidebar.
2. Click **"New Campaign"** button.
3. Fill in the campaign form:

Field	Description
Title	Campaign headline (required)
Body	Rich text content — supports bold, italic, underline, links, images, colors, text alignment (powered by TipTap editor with 8 extensions)
Link URL	Optional call-to-action URL
Pinned	Toggle to pin the campaign to the top of candidates' notification feeds
Scheduled At	Optional — schedule the campaign for a future date/time

4. **Targeting Options:**

Target Method	Description
All Candidates	Send to everyone
By Country	Select specific countries
By Field of Work	Select specific fields (Computer Science, Marketing, etc.)
By Education Level	Target by Bachelor, Master, PhD, etc.
By Email	Target specific email addresses

5. An **audience preview** shows the estimated number of recipients before sending.
6. Save as **Draft** (default) to edit later, or proceed to send immediately.

Sending a Campaign

1. On a Draft campaign card, click **"Send"**.
2. The system:
    - Fetches all candidates matching the targeting criteria.
    - Checks each candidate's notification preferences (opt-out respected).
    - Creates individual notifications in batches of 500.
    - Updates the campaign status to **Sent**.
3. The campaign card now shows read statistics.

Campaign Actions by Status

Status	Available Actions
Draft	Preview, Edit, Send, Delete, Clone
Sent	Preview, Terminate, Clone
Terminated	Preview, Archive, Clone
Archived	Preview, Delete, Clone

- **Clone:** Creates a new Draft campaign with the same content and targeting (appends "(copy)" to title).

- **Delete:** Permanently removes the campaign and all associated notifications. Only available for Draft and Archived campaigns. A confirmation dialog is shown before deletion.

Read Statistics

For Sent, Terminated, and Archived campaigns, the card shows:

- Total recipients
- Read count and percentage (e.g., "72% read (36/50)")

Candidate-Side View

- Candidates see campaigns as notifications in their feed.
- **Pinned** campaigns appear at the top.
- **Archived** campaigns are hidden from the candidate view.
- Campaigns respect each candidate's notification preferences — candidates who opted out of promotional notifications won't receive them.

---

22. Notifications (HR)

HR Notification Feed

HR managers receive automatic notifications for recruitment events:

Notification Type	When It Triggers
HR Application Received	A candidate applies to a job
HR Application Withdrawn	A candidate withdraws their application
HR Assessment Completed	A candidate finishes an assessment
HR CV Uploaded	A new candidate CV is processed

Managing Notifications

- **Unread badge:** Bell icon in the header shows the unread count.
- **Mark as Read:** Click the checkmark icon on individual notifications.
- **Mark All as Read:** Bulk action to clear all unread badges.
- Notifications show **candidate name and email** alongside **job title and location** for context.

---

23. Improvement Tracks

> 🚧 **Placeholder:** The Improvement Tracks page exists in the dashboard but is currently a stub. The feature is designed for borderline candidates (score 45–60) who are close to meeting requirements.

Planned Feature: 14-Day Improvement Programme

The full implementation will include:

Component	Description
Track Enrollment	HR enrolls borderline candidates into a 2-week micro-learning programme
Daily Lessons	Content modules delivered over 14 days, focused on the candidate's weak areas
Progress Tracking	Visual dashboard showing daily completion and engagement
Reassessment	After programme completion, the candidate is offered a new language assessment

Planned Status Lifecycle

Status	Meaning
Enrolled	Candidate has been added to the programme
In Progress	Candidate is actively completing daily modules
Completed	All 14 days completed
Reassessment Pending	Waiting for the candidate to retake the assessment
Reassessed	Second assessment completed

> The database models (`ImprovementTrack`, `ImprovementProgress`) are in place. The daily lesson content, progress logic, and reassessment flow are not yet implemented.

---

24. Data Export

CSV Export

The platform supports exporting candidate data to CSV format using the **papaparse** library.

Export includes:

- Candidate personal info (name, email, location, country)
- Pipeline status
- CV scores (overall, experience, education, location)
- Languages and skill summaries
- Filter-aware — respects current search and filter criteria

PDF Export

> 🚧 **Planned:** PDF export for individual candidate profiles, assessment results, and fairness reports is not yet implemented.

Part III — Feature Status Reference

---

25. Feature Roadmap & Implementation Status

☑ Fully Implemented

Feature	Description
Role-based dashboard	Separate candidate and HR views with tailored navigation
AI-powered CV parsing	Groq Llama 3.3 70B (primary) + OpenAI GPT-4o (fallback) extract structured data
CV scoring engine	Deterministic 4-factor scoring: experience (35%), years (25%), education (20%), location (20%)
Duplicate detection	3-tier matching (email → name+location → name only)
Job management	Full CRUD for jobs with search, filter, pagination
Job scraping	Cheerio-based scraper for adidas careers (1,019 jobs, 50+ countries, 16 departments)
Internship management	Full CRUD with Erasmus+ support, mentor info, date ranges, stipend
Job applications	Apply, withdraw, status tracking with one-application-per-job constraint
Job-candidate matching	4-criteria engine: location, language+CEFR, experience, education
Notification system	16 notification types, preference-aware targeting, read/unread management
Promotional campaigns	Rich text campaigns with targeting (country, field, education, email), lifecycle (Draft→Sent→Terminated→Archived), read statistics, pinning
Candidate profile	Personal info, career preferences (availability, work model, relocation), nationality, bio
File storage	Local (dev) and Vercel Blob (prod) dual-mode storage
Magic link assessments	Token generation, email delivery via Resend, 48h expiry
CSV export	Filter-aware candidate data export
Unit test suite	56 tests across 6 files (scoring, matching, CV validation, text extraction, upload pipeline, storage)
Cloud deployment	Vercel + Neon PostgreSQL (serverless), fully operational

⚠ Partially Implemented

Feature	What Works	What's Missing

Feature	What Works	What's Missing
HR bulk CV upload	Upload route exists	Async processing, progress tracking, `ParsingJob` queue
Assessment execution	Magic link page, token validation, template system	Audio recording UI, speech-to-text (Whisper), timed sections, candidate submission flow
Assessment results display	Data model and scoring rubric	UI not wired to live data (currently shows mock data)
Candidate detail view	Page exists, basic data	Full profile view, CV viewer, assessment history, scoring breakdown
Collaborative notes	API endpoint functional	UI component to display/manage notes
Candidate tagging	Database model exists	API endpoints and UI
Improvement tracks	Database models, borderline detection algorithm	Daily content, progress logic, reassessment flow, UI
Analytics dashboard	Overview stat cards on home, Recharts installed	Charts not wired to live data on the dedicated analytics page

🔜 Planned (Not Yet Started)

Feature	Description
Authentication system	Replace demo role-selection with real login (JWT / OAuth)
ZIP archive CV upload	Extract and process multiple CVs from ZIP files
OCR for scanned PDFs	Tesseract.js or external OCR API for image-based CVs
BullMQ async processing	Queue-based background processing for large CV batches
Real-time updates	WebSocket/SSE for live progress tracking and notifications
Ethical AI / bias detection	Statistical fairness analysis, adverse impact ratio (4/5ths rule), score distribution by demographics
Blind review mode	UI toggle to hide candidate name, location, institution during evaluation
Fairness report	PDF/on-screen report with demographic analysis and flagged anomalies
PDF export	Profile reports, assessment results, fairness reports
Synthetic demo dataset	200–500 generated CVs for demonstration purposes

Feature	Description
E2E test suite	Playwright tests for critical flows: upload → parse → match → invite → assess → export
Component tests	React Testing Library + jsdom for UI component testing
API integration tests	Test database setup and endpoint testing
